TANK RENTAL PROGRAM

Don't want to pay the money up front for a new tank? Foster has the program just for you. Underground or above-ground, our tank rental program has got you covered.

Our rental program offers a convenient, cost-effective solution. Rent an above-ground or underground tank at competitive rates and with no long-term commitments. We'll also handle the installation, inspection, and filling of your tank, removing the burden from your shoulders.

FREE TANK MONITORING*

Foster Fuels can install a tank monitoring system that automatically alerts our team when your supply falls below a certain level.

Utilizing the Foster Fuels mobile app, you can monitor your propane levels. This is an example of how Foster Fuels embraces new technology to better serve our customers.

**Free for leased propane tanks*

"I received the best customer service I have ever had during the install. I could not believe how knowledgeable and nice the guys were. Everyone I have spoken to within the company has been great."

Victoria D. – Afton, VA

VENT-FREE

FOSTER FUELS COLLECTION

Few things are more enjoyable than curling up by a warm fireplace with a steaming cup of hot cocoa and a great book. Foster Fuels can help bring that daily comfort to your home.

We have the right set of gas logs to fit your home and your budget. Our experts picked the highest performing log sets in each price category.

Foster Fuels' vent-free fireboxes and log sets are designed to be installed and operated without a chimney, flue or vent. They can be installed in locations in your home where it would be impossible or cost prohibitive to install a vented fireplace.

Vent-Free

Fireplace system that does not need venting to operate. They are made to burn cleanly. This system is 99.9% efficient. It creates less pollution and slightly less gas consumption.

"If I needed propane or anything like that, Foster Fuels would be where I would go. I wouldn't care what the price was, just because the service was unbelievable and over-the-top."

Tyler – Lynchburg, VA

GAS LOG SETS

MONESSEN // BERKLEY OAK

Part of Monessen's deluxe series, these logs offer exclusive Natural Blaze technology. Achieving beautiful yellow flames instantly, Natural Blaze technology produces an authentic fire every time. These sets include millivolt control, low-profile design for a true glowing ember look, volcanic rock, and rock wool embers. These sets can reach up to 36,000 BTU.

SIZE	MODEL#
24"	BO24R, NB24PV

LUMONESSEN BURNER

The Lumonessen burner makes it easy and affordable to convert any fireplace to a centerpiece of daily living. One size fits all three Lumonessen hand-painted gas fireplace log sets—**Mezmer**, **Mezmer Split**, and **Mountain Oak**. Choose the one that fits your taste.

MONESSEN // MOUNTAIN OAK

Mountain Oak brings serenity with an impressive visual and coziness. This ventless log set includes hand-painted logs for a personal touch. It's made to fit the Monessen Lumonessen Vent-Free Burners and is available in 18", 24", and 30" lengths.

SIZE	MODEL#
24"	MTNOK-24, LUM-VF-PV

MONESSEN // MEZMER SPLIT OAK

Mezmer Split Oak provides a mesmerizing balance of flames and plenty of heat. This ventless log set includes hand-painted logs for a personal touch. It's made to fit the Monessen Lumonessen Vent-Free Burners and is available in 18", 24", and 30" lengths.

SIZE	MODEL#
24"	MZMRSP-24, LUM-VF-PV

MONESSEN // MEZMER LOG SET

Experience the outdoor lifestyle with the Mezmer Log Set. This set comes with realistic looking logs and charcoal embers. It's made to fit the Monessen Lumonessen Vent-Free Burners and is available in 18", 24", and 30" lengths.

SIZE	MODEL#
24"	MZMR-24, LUM-VF-PV

EMPIRE

GAS LOG SETS

EMPIRE // BIRCH BURNCRETE

Who says you can't have both heat and good looks? From the curve of each log to the height of the stack, the Empire Birch Burncrete logs complement the Slope Glaze Burner. It truly is one of the most realistic flame experiences in a vent free log set! Available in 18", 24", and 30" lengths.

SIZE	MODEL#
24"	LS24CB, VFSR24LP

SLOPE GLAZE BURNER

The Empire Slope Glaze Vent-Free Gas Burner has internal ceramic beads tumble the gas to create lifelike, dancing flames. It fits all the gas log sets on this page.

EMPIRE // STACKED WILDWOOD

The Empire Stacked Wildwood Vent-Free Gas Log Set offers the same cozy ambiance as a classic wood burning fireplace, minus the work. Available in 18", 24", and 30" lengths.

SIZE	MODEL#
24"	LS24WRR, VFSR24LP

EMPIRE // STACKED AGED OAK

The realistic logs provide maximum heat retention and feature hand-painted bark details with twists, knobs, and cracks to resemble authentic seasoned firewood. Available in 18", 24", and 30" lengths.

SIZE	MODEL#
24"	LS24SRAO, VFSR24LP

EMPIRE // PONDEROSA REFRACTORY

The Ponderosa Log Set is stacked high with attractive logs to fill the tallest fireplaces. Available in 18", 24", and 30" lengths.

SIZE	MODEL#
24"	LS24P, VFSR24LP

EMPIRE // SUPER SASSAFRAS

This distinctive log set will fill large fireboxes with seven logs and complement the burner pattern for a lifelike fire. 18", 24", 30" lengths.

SIZE	MODEL#

HSSVFBF20LPBT	20,000 BTU
HSSVFBF30LPBT	30,000 BTU

HEATSTAR // VENT-FREE INFRARED GAS HEAT

Multiple burner tiles utilize radiant heat, warming your space with the power of the sun. This heater will provide you with years of comfortable and safe heat. Includes both a factory standard ODS and the attachable heater leg stands.

MODEL#	HEAT OUTPUT
HSSVFRD10LPT	10,000 BTU
HSSVFRD20LPBT	20,000 BTU
HSSVFRD30LPBT	30,000 BTU

DIRECT-VENT AND VENTED COLLECTION

Kozy Heat offers complete lines of both **direct-vent inserts and fireplaces** that are affordable, elegant, and fully American-made, as well as a line of wood fireplaces with stylish accessories to complement any decor. Adding a fireplace is one of the best ways to increase the value of your home. Kozy Heat prides themselves in being dedicated to not only function and reliability, but customer safety as well.

Today, Kozy Heat is one of the leading fireplace manufacturers with a reputation for modern and contemporary designs combined with top energy efficiency for home heating. Kozy Heat boasts its high end look for an affordable price.

Common Features:

- Ember Bed Light Kit
- Blower
- Electronic Ignition
- Ceramic Glass
- Heater Rated
- Battery Powered Back-up

Direct-Vent

A sealed-combustion system which the air for combustion is drawn from the outdoors and waste combustion gases are exhausted into the outdoors.

Fireplace Inserts

These are direct-vent or vent-free appliances that are installed in existing wood-burning fireplaces.

"I get my propane from Foster Fuels... I know that when I go there, I am keeping the dollars local. As a small business owner, that is important to me as well... they are smiling faces that are engaged, they know my family... I get the real sense that they DO care."

Matt – Brookneal, VA

KOZY HEAT // BAYPORT FIREPLACE

Kozy Heat's direct vent gas fireplace is available in a visually appealing traditional log set or glass media style. It doesn't require a chimney or existing fireplace for successful installation.

Features:

- Large and impressive viewing area with a very realistic logs and burner system
- The Bayport comes in both the glass and log version
- Maximum comfort and efficiency available in both gas fireplaces
- A variety of panels and liners available
- Komfort Control Remote included
- Complements both traditional or contemporary design in the home
- 30,000 max BTU
- Millivolt option available/standing pilot remote capable
- Slimline fireplace, taking up less space
- Top and rear vent

SIZE	MODEL#
36"	BAY-36
41"	BAY-41

KOZY HEAT // BELLINGHAM LINEAR

This landscape design series offers an awe-inspiring option for your home. A lower profile fireplace that will work with a TV above the fireplace while still getting the look of a traditional fireplace.

Features:

- Variety of design options available
- Heat management options
- Top accent light kit
- 59,500 max BTU
- Ember bed light kit
- Split flow burner
- Optional Heat management system

SIZE	MODEL#

NORDIK LINE

KOZY HEAT // NORDIK DV FIREPLACE

Kozy Heat’s revolutionary EVO Elevated Burners create a stunningly realistic fire. Until now, fireplaces have created flames using two-dimensional burners on the firebox floor. EVOs elevated burners project flame form along and around the perimeter of the fireplace’s two signature logs, providing the depth and height of an actual fire.

Features:

- It comes in Traditional Log and Birch
- 48,000 max BTUs
- Viewing Area: 37-5/8 x 29-3/8
- Electronic Ignition Pilot System

SIZE	MODEL#
36"	NDK-36-DV
41"	NDK-41-DV
48"	NDK-48-DV

KOZY HEAT // NORDIK LINEAR

Kozy Heat’s revolutionary EVO Elevated Burners create a stunningly realistic fire. Until now, fireplaces have created flames using two-dimensional burners on the firebox floor. Introducing the tall linear Nordik Series!

Features:

- Comes in Traditional Log or Birch
- Fan Kit Optional
- Viewing Area: 60" x 20"
- Standard Ember Light Kit
- 51,000 max BTUs
- Standard Top Light Kit
- Electronic Ignition Pilot System
- Certified to ANSI Z21.88 Vented Gas Heater
- Ceramic Glass

SIZE	MODEL#
48"	NDK-48-TL
60"	NDK-60-TL

KOZY HEAT // NORDIK INSERT

This modern, Scandinavian-aesthetic style focuses on clean lines, functionality, and warmth. It can be incorporated into virtually any home.

Features:

- Large and impressive viewing area with a very realistic logs and burner system
- Complements both traditional or contemporary design in the home
- 40,000 max BTU's
- The Bayport comes in both the glass and log version

- Slimline fireplace, taking up less space
- Komfort Control Remote included
- Top and rear vent

SIZE	MODEL#
29"	NDK-29-i
34"	NDK-34-i

DIRECT-VENT & VENTED SPACE HEATERS

Empire Vented Room Heaters are crafted for visual appeal and maximum efficiency. Just like a wood stove, they use room air for combustion. Vent pipes connect the heater to a chimney or flue to carry the by-products of combustion outside.

EMPIRE // RH-35 & RH-50

Heat large areas economically with Empire's vented room heaters. With this efficient B-Vent heat flow, the durable RH-35 & RH-50 models offer ample warmth to make any room comfortable. The one-piece glass enclosure on the RH-50 allows you to see the flame as it heats, while the optional ceramic logs add visual interest. The closed front on the RH-50 easily fits any décor. An optional internal blower (DRB-1) can be purchased separately for added circulation.

MODEL#	HEAT OUTPUT
RH35LP	35,000 BTU
RH50CBLP	50,000 BTU
RH65BLP	65,000 BTU

KOZY HEAT // LAKEFIELD XL

Because the free-standing gas fireplaces we offer are direct-vent, there's no need for a chimney or traditional fireplace to install them. A direct-vent model can connect to the exterior of your home through venting, allowing outside air to circulate around the firebox. This opens up a wealth of possibilities for location, enabling energy-efficient warmth in almost any room of the house. Even homes that weren't originally constructed to accommodate a gas appliance are often suitable for the installation of a free-standing gas fireplace.

- Viewing Area: 16" x 22"
- 39,000 max BTUs
- Ceramic Glass
- Standard Traditional Legs
- Patented Burner & Log design
- Limited Lifetime Warranty

TANKLESS WATER HEATERS

RINNAI // TANKLESS WATER HEATER SERIES

THE SMART CHOICE IS THE #1 CHOICE

Rinnai's commitment to quality has made them the #1 selling tankless water heating brand in North America. Foster Fuels features Rinnai as our top water heater brand.

- Put worrying about hot water out of your mind
- More space for you
- Family-friendly, earth-friendly
- Save on energy while boosting your home's value

KEY FEATURES:

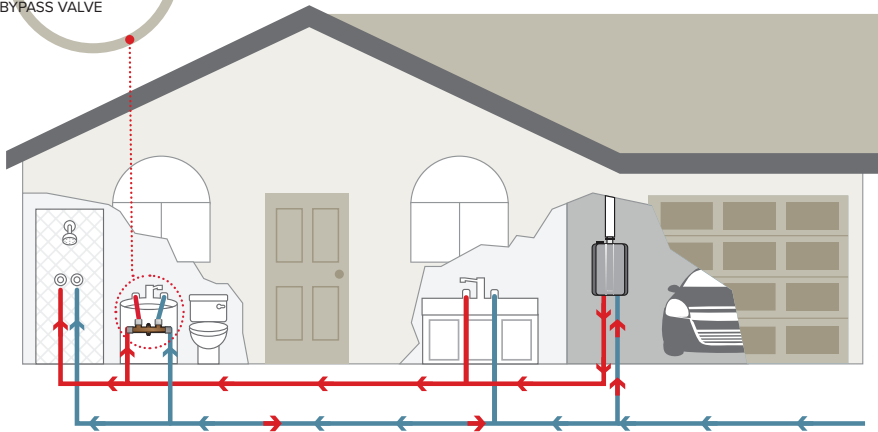

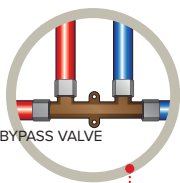

- Delivers an endless supply of hot water
- Only heats water when it's needed
- Compact size saves roughly 12 ft² of floor space
- Saves more than \$150/year in energy costs when compared with typical electric storage water heaters
- Produces 50-60% lower CO₂ emissions when compared with electric storage tank systems
- May qualify for tax credits and rebates
- Wi-Fi Technology
- Indoor and outdoor use

MODEL#	MODEL NAME
RX199IN	RINNAI RX SERIES 11.1 GPM
RX180IN	RINNAI RX SERIES 10.0 GPM
RX160IN	RINNAI RX SERIES 9.0 GPM

FASTER HOT WATER // HOT WATER ON YOUR SCHEDULE

Many Rinnai tankless models come standard with recirculation technology, a built-in feature that lets you activate recirculation during times of high hot water demand.

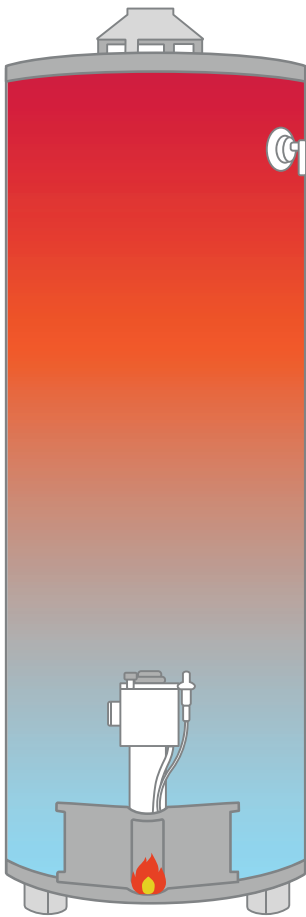

You can activate recirculation with smart home devices, push button technology, or with motion sensors that detect when family members are present. Both connect to your system wirelessly to trigger recirculation only when you need it.

CROSSOVER MODE RECIRCULATION

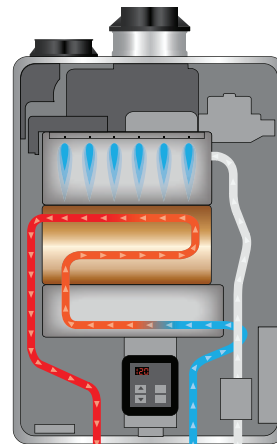

Rinnai

INEFFICIENT ELECTRIC TANK WATER HEATER

- Limited capacity means limited hot water supply
- Wastes energy by heating water again and again, whether you need it or not
- Failure often means leaks, which can mean costly damage

TANKLESS WATER HEATER

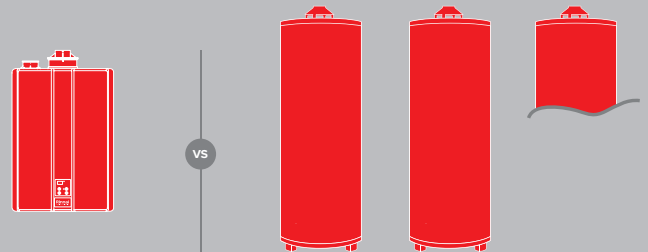

HOT WATER OUTLET
COLD WATER INTAKE
GAS INTAKE

- Delivers endless supply of hot water
- Heats water only when you need it, saving significant energy costs
- Lasts 2x longer than a tank and has lower repair costs
- Frees up more space in your home

VS

The lifespan of one Rinnai Tankless Water Heater compared to the lifespan of a traditional tank water heater.

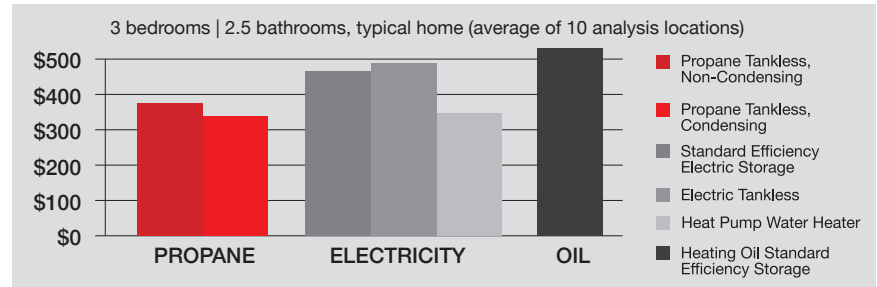

TANKLESS WATER HEATER

STANDARD 40-GALLON GAS TANK WATER HEATER

ENERGY CONSUMPTION & COST

Given Energy Factors as high as 0.99, propane tankless systems operate very efficiently, and therefore have relatively low fuel consumption and costs. The bar graph (right) illustrates that propane condensing tankless systems save roughly \$150-200/year compared with typical electric storage water heaters or heating oil systems.**

ANNUAL ENERGY COST FOR WATER HEATERS*

*data as of 2023

A CENTURY OF SERVICE

Foster Fuels is a fourth-generation Foster family-owned-and-operated business headquartered in Campbell County, Virginia, serving customers in all regions of the United States and internationally. Through 100 years of innovation and a drive to exceed its customers' expectations, Foster Fuels has continued to be an industry leader and sets the bar in customer service.

1919

As WWI veterans, Lou Hilton "L. H." Foster Sr. and L. W. Roark Sr. start Brookneal Oil Company, delivering flour, ice and five-gallon cans of lamp oil to the Brookneal area by ox-drawn cart.

1921

L. H. and L. W. split the company. Hilton and his wife, Inez, assume the oil business and Brookneal Oil becomes a consignee with Texaco, the first in the area. Hilton & Inez have their first son, L. H. Jr.

1945-1955

Hilton and Inez have another son, Watt "Bobby" Foster. Brookneal Oil Co. changes to become L. H. Foster & Sons. L. H. Jr. eventually takes over operations. L. H. Foster & Sons continues to grow while Bobby attends the University of Richmond.

1936

L. H. Jr. enlists for WWII through the ROTC program while still attending Virginia Tech. Though sustaining a permanent leg injury, he continues in service.

1958

Bobby graduates from the University of Richmond and works alongside his brother. With the passing of their father, the second generation of the Foster family leads the company.

1960

Bobby and Nancy have a son, Watt Jr. The family business is incorporated on September 12th. L. H. Jr. is assigned as president.

1966

Bobby adds propane to the business' services.

1987

Company officially changes name to Foster Fuels, Inc.

1982

Watt R. Foster Jr. graduates from James Madison University and joins the Foster Fuels team, becoming the third generation of Foster family to join the business.

1975

Foster Fuels continues to purchase other local fuel businesses as Bobby takes the new role of president

1989

Remaining president, Bobby sells Foster Fuels to his son, Watt Jr. serves as VP.

1990

The family business drops Texaco to become an independent fuel jobber.

2003

Foster Fuels begins offering emergency fuel delivery services.

2005

Hurricane Katrina makes history with its effects to the Gulf Coast. Foster Fuels provides relief fuel services for the federal government, marking the company's expansion into fuel support services for disaster relief.

2013-2018

Showrooms expand to Charlottesville, Forest, Huddleston and Livingston making 7 total locations.

2012

Foster Fuels responds with a large scale effort to provide power to the affected area during Hurricane Isaac and Sandy.

2008

Watt accepts the role of president for the family business and Bobby takes role as VP.

2007

Watt Jr. and father, Bobby, open a new headquarters to facilitate a growing staff.

2014

Watt donates land for a children's camp to Thomas Road Baptist Church in honor of his father, Bobby Foster, Sr.

2017

Foster Fuels spends over one hundred successive days responding to three record-breaking hurricanes (Harvey, Irma, and Maria) during the 2017 hurricane season.

2020

Foster Fuels helps Louisiana and Texas after the damages caused by Hurricane Laura during the COVID-19 pandemic.

2021

Foster Fuels activates to help with ice storms in Virginia and Texas.

2021

Foster Fuels activates to help with Hurricane Ida in Louisiana.

COMMITTED TO *Community*

Community involvement and giving has always been close to the heart of the Foster family. Through Foster Fuels partnership with the Foster Foundation, we have the unique opportunity to participate in, donate to, and give back to the community around us as part of the **#FosterGives** campaign.

President, CEO, Foster Fuels, Inc.

#FOSTERGIVES

PROPANE IS ENVIRONMENTALLY FRIENDLY

Propane is an excellent way to reduce your emissions while meeting your energy needs. It's a clean, non-toxic energy source that will not contaminate soil or groundwater. Renewable propane sourced from used cooking oil and other waste products is carbon-neutral.

PROPANE FOR YOUR HOME

Using propane appliances in your home can help reduce your carbon footprint compared to other energy sources.

Propane appliances are more energy efficient, so you save on monthly energy costs while also benefiting the environment.

Propane backup generators can help keep your home safe from power outages that can cause discomfort for the family.

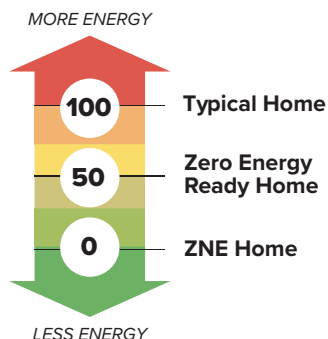

Everyone deserves access to energy.

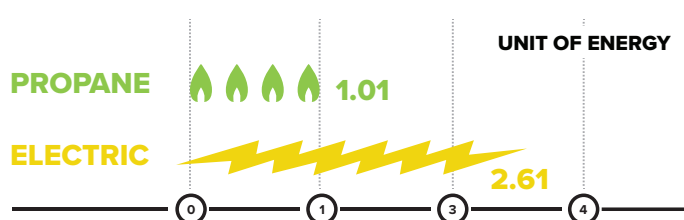

REACHING **ZERO NET** ENERGY

MEASURE ZNE PROGRESS

The Home Energy Rating System (HERS) Index is used to measure efficiency. The lower the score, the better.

61 is the average HERS score in 2018.

It takes 2.61 units of electricity to produce and deliver one unit of energy to a home, versus just 1.01 for propane. Propane wins hands down.

*This data is based on national averages it may be different in your area.

Building a Zero Net Energy Home with Propane

Using propane appliances, you can significantly lower a home's energy consumption, making it easier to achieve Zero Net Energy (ZNE) goals and deliver premium performance to homeowners. It's why propane should be a part of every builder's ZNE strategy.

PROPANE BENEFITS

Propane is not only energy efficient, it lowers first costs and emissions. It is also highly effective in any area of the country for a variety of temperatures.

Value for your energy per dollar

Exceptional performance

Clean fuel

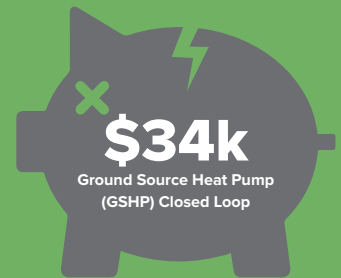

FIRST COSTS

Of High-Performance Systems

\$11k
Propane Furnace
& Air Condition

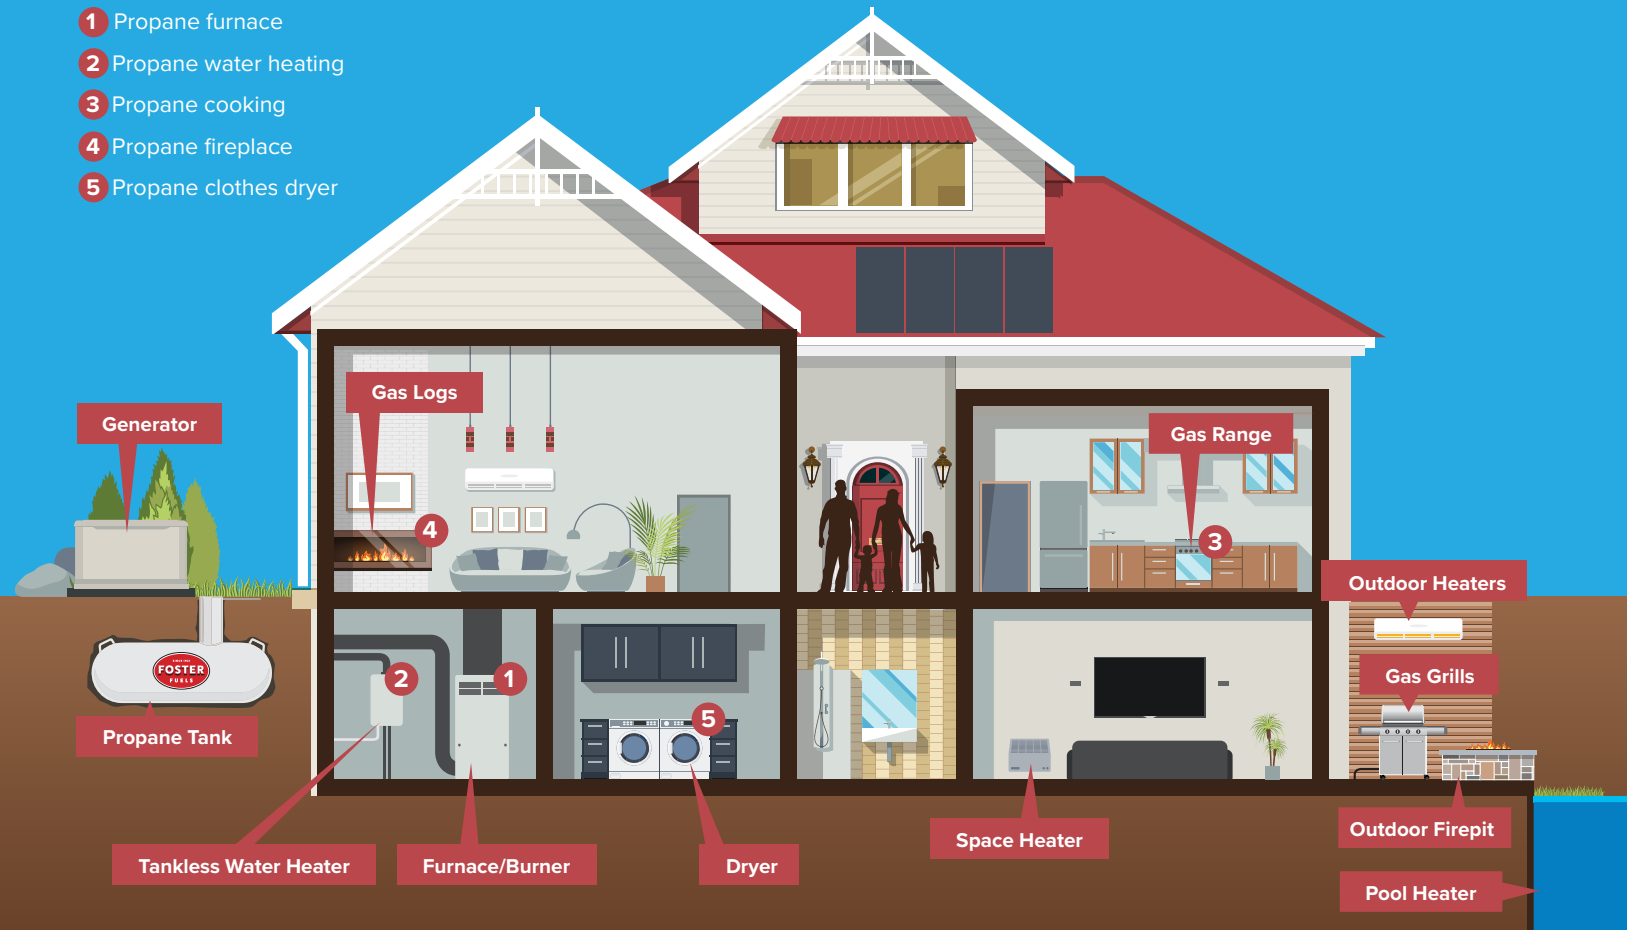

VS

\$34k
