You're On AutoFill!

No need to keep track of
your tank level, we're on
it for you.

No Additional Fees!

Propane Tank Guide

Foster Fuels offers tank rental programs, tank monitoring services, GAS Check®, and a variety of different tank sizes to meet your needs.

CALL US & ASK ABOUT OUR
FREE* TANK SWITCH-OUT!

434-333-6555

**material cost not included*

Tank Rental Program

Don't want to pay the money up front for a new tank? Foster has the program just for you. Underground or above-ground, our tank rental program has got you covered.

Our rental program offers a convenient, cost-effective solution. Rent an above-ground or underground tank at competitive rates and with no long-term commitments. We'll also handle the installation, inspection, and filling of your tank, removing the burden from your shoulders.

Tank Monitoring*

Foster Fuels can install a tank monitoring system that automatically alerts our team when your supply falls below a certain level.

Utilizing the Foster Fuels mobile app, you can monitor your propane levels. This is an example of how Foster Fuels embraces new technology to better serve our customers.

**Free for leased propane tanks*

120 Gallon

Vertical or horizontal.
For customers with 1-2
propane appliances.
Typical logs, wall
heaters, etc.

250 Gallon

Customers with 2-3
propane appliances.

325-500 Gallon

For generators, furnace usage,
whole-home heating, or customers
with 3-5 propane appliances.

1000 Gallon

For high-volume users.
Typically whole-home
heating, commercial use,
barn heating, etc.

GALLONS	USABLE (IN GALLONS)	DIAMETER	HEIGHT	LENGTH	EMPTY WEIGHT
120 (V)	96	30"	4'6"	X	260 LBS
120 (H)	96	24"	2'9"	5'9"	260 LBS
250	200	30"	3'3"	7'10"	483 LBS
325	260	30"	3'7"	10'1"	597 LBS
500	400	37"	4'1"	9'10"	949 LBS
1000	800	41"	4'3"	16'	1760 LBS

WHY REFILL OVER SWITCH-OUT?

Refilling your propane grill tank is **more cost-effective and efficient** than exchanging. A refill gives you a full 20-pound tank at a lower price, while exchanges often provide only 15 pounds—costing up to 65% more. Choose a trusted provider like Foster Fuels to save money and ensure your grill is fully fueled.

Vent-Free

FOSTER FUELS COLLECTION

Few things are more enjoyable than curling up by a warm fireplace with a steaming cup of hot cocoa and a great book. Foster Fuels can help bring that daily comfort to your home.

We have the right set of gas logs for your home and your budget. Our experts picked the highest-performing log sets in each price category.

Foster Fuels' vent-free fireboxes and log sets are designed to be installed and operated without a chimney, flue or vent. They can be installed in locations in your home where it would be impossible or cost-prohibitive to install a vented fireplace.

Vent-Free

A Vent-Free fireplace system does not need venting to operate. They are made to burn cleanly. This system is 99.9% efficient and releases heat directly into the room.

Excellent customer service and response time — from phone to delivery staff!

Direct-Vent

AND VENTED COLLECTION

A **direct vent gas fireplace** is the perfect combination of beauty, comfort, and efficiency. Designed with a sealed combustion system, it draws air from outside and safely vents exhaust outdoors, providing reliable warmth while maintaining indoor air quality. With realistic ceramic logs, vibrant flames, large glass viewing areas, and elegant finishes, today's direct vent fireplaces deliver the high-end look of a custom-built fireplace without the mess of wood. Common features include electronic ignition, remote controls, thermostatic temperature settings, variable flame adjustment, and energy-efficient heat output, making it an attractive and convenient addition to any home.

Common Features:

- Ember Bed Light Kit
- Blower
- Electronic Ignition
- Ceramic Glass
- Heater Rated
- Battery Powered Backup

Direct-Vent

A sealed combustion system, in which the air for combustion is drawn from the outdoors and waste combustion gases are exhausted into the outdoors.

Fireplace Inserts

These are direct-vent or vent-free appliances that are installed in existing wood-burning fireplaces.

"I can't speak highly enough of my experience with Foster Fuels."

Andrew R.

Direct Vent Fireplaces

BAYPORT FIREPLACE // KOZY HEAT

Kozy Heat's direct-vent gas fireplace is available in a visually appealing traditional log set or glass media style. It doesn't require a chimney or existing fireplace for successful installation.

Features:

- The Bayport comes in both the glass and log version
- Maximum comfort and efficiency available in both gas fireplaces
- A variety of panels and liners available
- Komfort Control Remote included
- Complements both traditional and contemporary design in the home
- 30,000 max BTUs
- Millivolt option available/standing pilot remote capable
- Slimline fireplace, taking up less space
- Top and rear vent

SIZE	MODEL#
36"	BAY-36
41"	BAY-41

NORDIK DV FIREPLACE // KOZY HEAT

Kozy Heat's revolutionary EVO Elevated Burners create a stunningly realistic fire. Until now, fireplaces have created flames using two-dimensional burners on the firebox floor. EVO elevated burners project flame form along and around the perimeter of the fireplace's two signature logs, providing the depth and height of an actual fire.

Features:

- Light Kit, Ember Bed Light Kit and Fan Kit included
- Comes in Traditional Log and Birch
- 48,000 max BTUs
- Electronic Ignition Pilot System
- Optional Firebox Panels (Black Glass, LedgeStone, Herringbone, Black or Chicago Brick)

KEY FEATURES:

- Delivers an endless supply of hot water
- Faster hot water
- Only heats water when it's needed
- Compact size saves roughly 12 ft² of floor space
- Saves more than \$150/year in energy costs when compared with typical electric storage water heaters
- Produces 50-60% lower CO₂ emissions when compared with electric storage tank systems
- May qualify for tax credits and rebates
- Wi-Fi Technology
- Indoor and outdoor use

Learn All About The Differences Between Tank and Tankless!

ANNUAL ENERGY COST FOR WATER HEATERS*

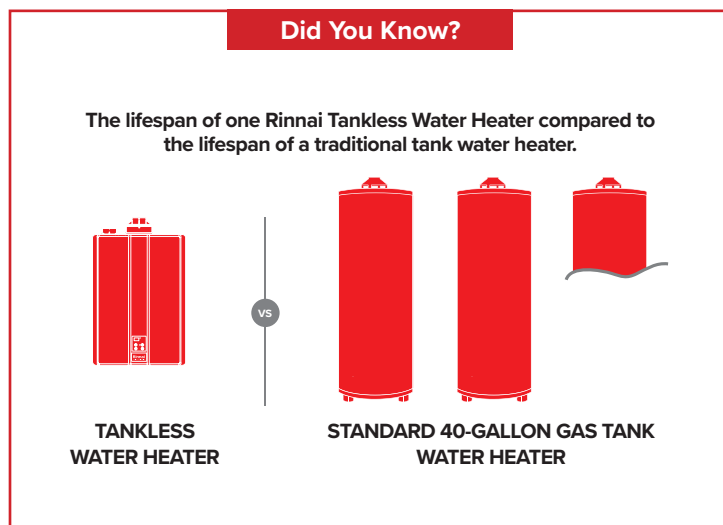

ENERGY CONSUMPTION & COST

Given Energy Factors as high as 0.99, propane tankless systems operate very efficiently, and therefore have relatively low fuel consumption and costs. The bar graph (right) illustrates that propane condensing tankless systems save roughly \$150-200/year compared with typical electric storage water heaters or heating oil systems.**

ENERGY EFFICIENCY: A propane tankless water heater transfers propane's thermal energy into hot water by up to a 0.99 Energy Factor (EF).*

A Century of Service

Foster Fuels is a fourth-generation Foster family-owned-and-operated business headquartered in Campbell County, Virginia, serving customers in all regions of the United States and internationally. Through 100 years of innovation and a drive to exceed its customers' expectations, Foster Fuels has continued to be an industry leader and sets the bar in customer service.

1919

As WWI veterans, Lou Hilton "L. H." Foster Sr. and L. W. Roark Sr. start Brookneal Oil Company, delivering flour, ice and five-gallon cans of lamp oil to the Brookneal area by ox-drawn cart.

1921

L. H. and L. W. split the company. Hilton and his wife, Inez, assume the oil business and Brookneal Oil becomes a consignee with Texaco, the first in the area. Hilton & Inez have their first son, L. H. Jr.

1945-1955

Hilton and Inez have another son, Watt "Bobby" Foster. Brookneal Oil Co. changes to become L. H. Foster & Sons. L. H. Jr. eventually takes over operations. L. H. Foster & Sons continues to grow while Bobby attends the University of Richmond.

1936

L. H. Jr. enlists for WWII through the ROTC program while still attending Virginia Tech. Though sustaining a permanent leg injury, he continues in service.

1958

Bobby graduates from the University of Richmond and works alongside his brother. With the passing of their father, the second generation of the Foster family leads the company.

1960

Bobby and Nancy have a son, Watt Jr. The family business is incorporated on September 12th. L. H. Jr. is assigned as president.

1966

Bobby adds propane to the business' services.

1987

Company officially changes name to Foster Fuels, Inc.

1982

Watt R. Foster Jr. graduates from James Madison University and joins the Foster Fuels team, becoming the third generation of Foster family to join the business.

1975

Foster Fuels continues to purchase other local fuel businesses as Bobby takes the new role of president

1989

Remaining president, Bobby sells Foster Fuels to his son, Watt Jr. serves as VP.

1990

The family business drops Texaco to become an independent fuel jobber.

2003

Foster Fuels begins offering emergency fuel delivery services.

2005

Hurricane Katrina makes history with its effects to the Gulf Coast. Foster Fuels provides relief fuel services for the federal government, marking the company's expansion into fuel support services for disaster relief.

2013-2018

Showrooms expand to Charlottesville, Forest, Huddleston and Lovington making 7 total locations.

2012

Foster Fuels responds with a large scale effort to provide power to the affected area during Hurricane Isaac and Sandy.

2008

Watt accepts the role of president for the family business and Bobby takes role as VP.

2007

Watt Jr. and father, Bobby, open a new headquarters to facilitate a growing staff.

2017

Foster Fuels spends over one hundred successive days responding to three record-breaking hurricanes (Harvey, Irma, and Maria) during the 2017 hurricane season.

2020

Foster Fuels helps Louisiana and Texas after the damages caused by Hurricane Laura during the COVID-19 pandemic.

2021

Foster Fuels opens office in Phoenix, AZ.

2021-2024

Foster Fuels activates to help with ice storms in Virginia and Texas, and hurricanes Ida, Helene, and Milton.

2026

Foster Fuels wins "Best Place To Work" with the Virginia Business Magazine, two years in a row.

COMMITTED TO *Community*

FOSTER
FOUNDATION

Community involvement and giving has always been close to the heart of the Foster family. Through Foster Fuels' partnership with the Foster Foundation, we have the unique opportunity to participate in, donate to, and give back to the community around us as part of the **#FosterGives** campaign.

PROPANE IS ENVIRONMENTALLY FRIENDLY

Propane is an excellent way to reduce your emissions while meeting your energy needs. It's a clean, non-toxic energy source that will not contaminate soil or groundwater. Renewable propane sourced from used cooking oil and other waste products is carbon-neutral.

WHY PROPANE?

CLEAN

Propane and renewable propane are low-carbon energy sources that produce fewer emissions than the equivalent amount of electricity generated from the U.S. grid.

SAFE

Propane is recognized as a safe fuel when handled, stored, and used in accordance with industry-standard safety guidelines and practices.

RELIABLE

Millions of Americans rely on propane for resilient, always-on energy that is independent from the electric grid.

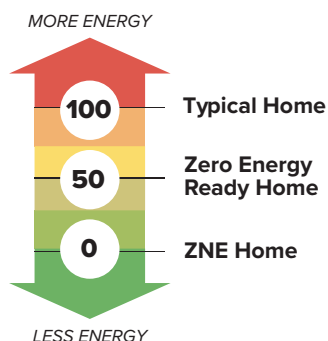

AFFORDABLE

Propane can reduce energy bills for both families and businesses. Plus, propane equipment generally lasts longer than electric models, making it more cost-effective.

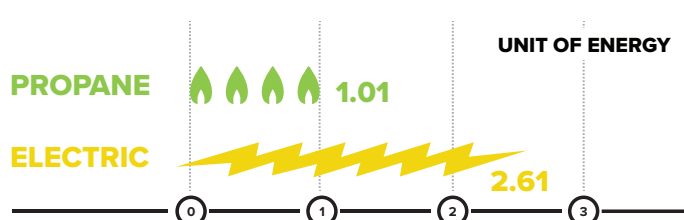

REACHING ZERO NET ENERGY

MEASURE ZNE PROGRESS

The Home Energy Rating System (HERS) Index is used to measure efficiency. The lower the score, the better.

61 is the average HERS score in 2018.

It takes 2.61 units of electricity to produce and deliver one unit of energy to a home, versus just 1.01 for propane. Propane wins hands down.

*This data is based on national averages it may be different in your area.

Building a Zero Net Energy Home with Propane

Using propane appliances, you can significantly lower a home's energy consumption, making it easier to achieve Zero Net Energy (ZNE) goals and deliver premium performance to homeowners. It's why propane should be a part of every builder's ZNE strategy.

PROPANE BENEFITS

Propane is not only energy efficient, it lowers first costs and emissions. It is also highly effective in any area of the country for a variety of temperatures.
